WEINTEK

Mobile Monitoring Tools Meeting Diverse Needs

Weintek' s three mobile monitoring solutions bring production insights from equipment to the users. Considering the requirements for each case, one may choose the most appropriate tool to use from cMT Viewer, WebView, or VNC Viewer.

Introduction Video

VNC Viewer

A VNC monitoring app.
Those who are already using VNC can simply use it to monitor HMI screens.

WebView

This intuitive monitoring solution makes it possible to monitor HMI screens on a web browser, such as Chrome, Firefox, or Safari.

cMT Viewer

Weintek' s monitoring app. It allows both multi-HMI / multi-user monitoring, and features control token safety mechanism to prevent operation conflicts in multi-user situations.

Monitor Mode:

Simultaneously monitor up to 50 HMIs, maximizing monitoring efficiency with minimal manpower.

Bringing Production Insights Within Reach

	VNC Viewer	WebView	cMT Viewer
Software	VNC Client app	Web browser	cMT Viewer app
Key Characteristics	Easy integration with existing monitoring methods	No software installation required	Simultaneous monitoring of multiple devices
Local HMI Screen & Monitoring App	Screen mirror	Screen mirror	Can display different screens
Multi-Device Monitoring	×	×	Monitor Mode Max: 50
Refresh Speed	Medium Capture entire HMI screen	Medium Capture entire HMI screen	High Update data
Multi-User Connection	Max: 10	Max: 4	Max: 10
User Authentication	VNC Server Password	WebView Password	HMI User Password
Operational Safety	Interlock (coming soon)	Interlock (coming soon)	Control Token * multi-user access control.
Encryption	×	○ TLS Encryption	○ TLS Encryption
Cross-Platform (Mobile Devices, Computers)	○	○	○
EasyAccess 2.0 Compatibility	○	○	○
Eligible Models	iE / XE / cMT / cMT X	cMT X Standard, Advanced	cMT / cMT X Standard, Advanced
